Instead of a gain in cash, the moderate reflection of the week's operations, use institutions than at any previous period. lanks will receive about as much more, already regaged, from various sources, and this, with gains expected from the interior ought to assure a rather steady increase of reserve. actor that must also be taken into consideration - the steadily expanding bank note circulation, w total of which is now \$30,717,830. This in crease is confined not alone to New York, but is ceneral the country over. Within the year national bank currency has expanded \$85,000,000, which is really equivalent to that amount gold or other currency. Whether the high figure now reached will be maintained since the needs of the interior have been satisfied is a question that is exciting some attention at present, and the answer involves the question of future 'nterest rates to more or less extent. It is interesting to compare the present statement with the one issued on the eve of election four years ago. The gain in principal items has been as follows: Leans, \$346,689,900; deposits, \$295,329,300; reserve, \$87,319,560; c. culation, \$10,222,690. The

by the Pressed Steel Car Company, helped the latter stock to the extent of three points, and other members of the group 1 to 11/2. There was an urgent demand from a short interest in Sugar, and some of the New York public utilities shot upward bucyantly. In the railroad list gains were small, but general. Louisville sold in a small quantity at 1% over Friday night's level, and only a few other railroad stocks gained as much as a point. Just before the close prices ran off sharply on profit-taking, which was conspicuous in Sugar and Brooklyn Transit. The tone was easy at the end. Sentiment was not much discomposed by Friday's call loan market, as it was attributed in part to manipulation. The conditions which made the manipulation effective are felt to be temporary. and the quick weakening of a sterling exchange, Friday, in response to the rise in money, gave confidence that any requirement for money would draw additional gold from Europe. The Stock Exchange seemed to expect a gain in cash to be shown in the bank statement, as there was a failure to take account of last Saturday's statement having anticipated the effect of large payments for gold, which are made to figure again in this week's statement of sub-treasury operations. Had it not been that the gain on the interior movement ran up considerably over Friday's preliminary estimates, the decline in the reserves would have been considerable. The reduction in the loan and deposit items made the decrease in the surplus nominal. A feature in the outside market was buying of Standard Oil up to 606, and 610 bid. The previous high record for the stock was 600.

Last week's rapid speculative activity has been checked this week, and the volume of dealings has fallen off to near the point of midsummer duliness. There is a disposition in Wall street to attribute this to a judicious curbing process by what are called the "controlling interests," meaning the interests which are deeply committed to speculative ventures. This is so far true that the inordirate manipulation, which was the feature of last week's dealings, has been largely discontinued. It is also true that the commission houses in Wall street have advised their customers against further commitments in stocks. Some of them have demanded additional cash margins from their clients to hold stocks over the election, thus forcing some truistic spirit on the present controlling in pected demand by buying stocks. THREATS OF THE FUTURE.

speculative holdings upon the market. Some ob-servers have attributed these measures to an traint about taking all the good things in sight But additional motives may be discerned, the foremost being the possibility of pitfalls in the future for such a headlong speculative gait as that pursued last week and previous to that time. The speculation has been based on the assumption that a large demand for stocks would spring up after the election on the part of the public at large. The industry expended in get ting prices to a higher level has been intended to accommodate this expected outside demand. But it became evident last week that the outside public, with a degree of sophistication for which professional Wall street does not always give it credit, was itself discounting the ex-This development threatened the future in two volume of the long stock which would be thrown upon the market to realize at that time. "controlling interests," therefore, sold large amounts of stock to feed this anticipated deing it. The advance in the money rate during of the precautionary measures adopted. Had there been much larger amounts borrowed for speculation, the disturbance of money rates would have been more severe and the forcing of liquidation on a much larger scale. The stiffening of the call loan rate is attributed to the exigencles of the monthly settlement, and it is hoped that, with the redistribution of the amounts thus borrowed in the form of dividends and interest, there will be returning case of money next week. Needless to say, the "controlling interests" also hope there will be a renewal of speculative demand for stocks with the easier money market. On the side of promised ease of money are

the further amounts of imported gold which are still to be received and counted in bank reserves. These include another consignment of over \$3,000,000 in transit from Australia. There are larger sums of Alaskan gold, also, in sight. appears that the interior demand for curhe sub-treasury until Friday. The figures of the controller of the currency show that naional bank circulation expended during October \$3,289,530, and the current demand for Government bonds and the exchange of old bonds for new 2 per cents., show a continuance of the desire for new circulation. On the other side of the account there is to be considered the incrased demand for money, which will spring up if business revives after election to the extent the speculative world is counting upon. A renewal of the movement to the interior of cur-

rency is thus among the possibilities. Bankers point out that, owing to the high price at which cotton has been marketed, larger mounts of money will be retained at the South after the process has been completed than for several years. It is expected that when the time comes for the reflux of money from the interior channels, the first result will be seen in the presentation of bank notes for redemption, 3 mixed, 30; No. 4 mixed, 8; total, 73 cars. The large current collections oy the Government on account of internal revenues call attention to the fact that the gross revenue is running above that of last year to the extent of more than \$4,000,000 in October. The surplus has been kept down only by increased expenditures, mostly for War Department requireients in connection with the military operations China, and which are in process of cutting down. An increase in the Government surplus would embarrass the money market, and last

Sterling exchange hovers near the gold import point, and it is evident that any real money stringency would draw further gold. But the Bank of England is striving to check inrolls on its low gold reserve. The Bank of France is abundantly supplied with gold, but French markets are unfavorably affected by political roubles in Spain, and by uneasiness over the course of domestic events following the close of the exposition, which has been a period of commonly recognized truce in French politics. The German money markets have made good progress towards recuperation, but are not expected to be in condition to meet foreign requirements for

LOCAL GRAIN AND PRODUCE.

A Week of Quiet Trade with but Few Changes in Values.

It would be untrue to say that the business of the week ended Nov. 3 had been even satisfacposed to complain, as usually, during a presidential campaign, there are several weeks of dull apparent on account of the political conditions. Until the election is over but little business is expected. Traveling salesmen will remain at home until Wednesday or Thursday of next week, when, should McKinley be elected, the merchants, almost without exception, look for a brisk trade through the fall and winter at a good price, the country which is supplied from this market will be well provided with money. Tax-paying will be out of the way, and as retail merchants have light stocks, buying change in prices as compared with Monday. Linseed oil still has a hardening tendency, as do some descriptions of hog products. Staple groceries are firm in tone and moving well. On commission row it was an off week, the weather being too warm and pleasant to give life to rales

of fruits and vegetables. The local grain market, while much more active than a few weeks ago, was not as active as in the preceding week. Still, receipts of grain, especially of corn, were large, and prices were well held, corn being at the close of the week but 1/2c lower than on Monday. The week closed with track bids, as reported by the secretary of the Board of Trade, ruling as follows: Wheat-No. 2 red, 7314c; No. 2 red, on milling freight, 7314c; No. 3 red, 69@71c; wagon wheat, Corn-No. 1 white, 36%c; No. 2 white, 36%c; No. 3 white, 364c; No. 4 white, 33@35c; No. 2 white, mixed, 36½c; No. 3 white mixed, 36½c; No. 4 white mixed, 36½c; No. 2 yellow, 36½c; No. 3 yellow, 36½c; No. 4 yellow, 35½c; No. 2 mixed, 36%c; No. 3 mixed, 36%c; No. 4 mixed, 32%c; ear

CATTLE QUIET AND STEADY ABOUT PREVIOUS PRICES.

Cents Lower-Sheep Quiet-Condition of Markets Elsewhere.

UNION STOCKYARDS, INDIANAPOLIS, Nov. usual on Saturday there were not many fresh and a year go. The market was quiet, most local killers claiming they were well supplied, but a very fair clearance was finally made at about steady prices, compared with the way equal kinds sold yesterday. The receipts this week are 800 smaller than last week and 200 smaller than the same week a year ago, and the receipts so far this year are over 1,500 larger than the same period last year. On account of the continued scarcity of choice stock the market has not been brisk this week, and prices were not up to the expectations of salesmen, but a greater part of the week it was easier to find buyers at more satisfactory prices for the good stock There was no big demand for stockers and feedwere about as badly neglected as usual, but at the close of the week the pens were very well cleared. After the middle of the week there was a weaker tendency in the market, and at extreme close sales were from 10@50c lower, the greatest change being on canners. Quotations: Good to prime steers, 1,359 lbs and up-

the receipts comparatively liberal for this time in the week the hog market naturally opened centrate their views. At prices ranging from weak to 5c lower, the average being generally considered 21/2c lower, packers were rather free buyers, and with a fair proportion selling to shippers the market was active, and a good clearance was made in good season. The receipts this week are 4,000 larger than last week, thus far this year there is a decrese of over 246,-000, compared with the same period last year. There have been frequent fluctuations in prices, but every rally was followed by an equal reaction, and at the close of the week the average was practically the same as at the opning, but about 21/265c lower than the high time. Local packers have been rather free buyers at ourrent prices, and the shipping demand was better than last week. Quotations:

Good to choice medium and heavy \$4.70@4.50 Mixed and heavy packing 4.65694.72 Good to choice light weights Common to fair light weights 4.55@4.60 Common to good pigs...... 3.50@4.50 Roughs 4.00@4.40 Sheep-Receipts, light; shipments, none. There

were very few fresh arrivals of sheep or lambs, and as usual at the close of the week the market was quiet, but a good clearance was made at quotably steady prices. Lambs were reported as high as \$4.50, and decent sheep sold at \$3. The receipts this week are a little smaller than last week, and about the same as the corresponding week a year ago. Thus far this year there is a decrease of over 8,000, compared with the same period last year. On account of the limited number marketed shippers were practically out of the market, and with just enough to supply the local butcher trade there was no chance for salesmen to dictate prices. Consequently there was no improvement in values over those cur average was maintained. During the week lambs sold as high as \$4.75, fancy sheep at \$3.75,

and good sheep at \$3.50. Quotations: Common to medium lambs...... 3.00@4.00 Good to choice sheep...... 3,00@3,50 Common to medium sheep..... 2.25@2.75 Stockers and feeding sheep...... 1.50@3.00 Bucks, per 100 lbs...... 2.00@3.00

Transactions at the Interstate Yards. INTERSTATE STOCKYARDS, INDIANAPO LIS, Nov. 3.-Cattle-Receipts, nominal; shipments none. The few fresh arrivals consisted of mixed butcher stock of rather poor quality. The market opened weak and lower on the common grades, while prime qualities were steady. Trade ruled very tame, and closed quiet, with all sold. Quotations:

Hogs-Receipts, 700; shipments, 490. The quality was fair, much the same as for some days past, being made up of light and mixed packing grades. The supply of heavy hogs continues quite light and the demand good. The market opened weak and lower, in sympathy with reports from other points. Trade ruled slow, but ably continue so until after the election. The closing was quiet, with all sold. Quotations:

Regarding the statements made that Count Von Buelow, the German imperial chancellor, does not oppose the recall of the Jesuits to Germany, the Associated Press correspondent learns reliably that this is untrue and that Count Von Buelow, no more than Prince Hohenlohe, would go

counter to the Emperor's firm will in this

matter, his Majesty opposing the recall. RAILROAD TIME CARD.
